

## Risk and Health & Safety Directors

We can help you manage your health & safety and your fleet risks with solutions that link to:

- ✓ YOUR corporate strategy & objectives
- ✓ YOUR business & commercial realities
- ✓ YOUR operational & management systems
- ✓ YOUR corporate governance controls

### Why is that important?

Corporate Manslaughter legislation, plus increased business competition and market pressures will require businesses to *'do things differently'*, by identifying where *'management failures'* can cause loss, injuries, deaths, reputation loss and complete failure — much more than just 'ticking the box'.

We help companies make a *step change* in the way they manage their risks to reduce their costs, improve their business processes, increase their competitive advantage, avoid large fines and stay in business.

### How do we do that?

By using our specially developed unique Risk-Based Profilers™ to:

1. Identify how your organisation is creating risks.
2. Identify if your health & safety and fleet systems meet your needs.
3. Identify how to merge health & safety and fleet systems into the business.

### What are the benefits?

- Business & commercially focused practical solutions
- Strategic pro-active risk managing advice — NOT risk averse 'tick the box'
- Reduced incidents, insurance premiums and unrecoverable losses
- Improved business efficiencies and employee morale

### Is it relevant for you?

Our Health & Safety and Fleet Risk Profilers™ are specially designed for:

- Large SME's & corporates
- Businesses with complex multi-site operations.
- Logistics companies and businesses with vehicle fleets.

### What Next?

We help you integrate health & safety and fleet risk management into your business. You achieve a sustainable reduction in risks & costs, remove potential 'management failures', motivate employees & improve the business.
